Hi David,

If you'd like to submit a letter to be published in the Annotated Warrant under Article 53, please see the section "Electronically Distributed Materials" in the Town Meeting Guidelines:

<https://www.arlingtonma.gov/home/showpublisheddocument/69552/638956805441370000>

Regards,

Greg Christiana

Subject: zoning bylaws affecting Broadway St

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear town meeting members:

I write to support the article drafted by my town meeting representatives Larry Slotnik and Joanne Cullinane that would clarify bylaw 5.8.3.E(1), docket article 53.

I feel strongly about the clarification because the proposals that I have reviewed seem to get the fifth floor bonus without meeting the requirements as I interpret them. I think ARB is making quick concessions that are not helpful in the long run. Five-story buildings on single lots are not an efficient use of space and will make the density of the MBMF Overlay District lower than it could be. The high density will support and be supported by the ground-level usage of the proposal.

I have read several proposals. The one closest to me physically is the one at the corner of Everett; I can see it from my back yard. I was surprised that first proposal received a positive recommendation. Had the initial recommendation been hesitant, we might have gotten to the present proposal, which combines two lots, more quickly. Maybe we would have gotten an even better proposal.

The bonus should be bonus. It should be used to encourage and reward developers who make extra effort to meet the requirements and the spirit of the requirements. Larger, non-residential spaces will be more flexible and therefore better support the walkability and vitality of the neighborhood of the year 2050.
